PROJECTS

BRITISH TELECOM (Admin Login)

Project 1.

Onward Billing Portal- The project is related to Billing. The invoice is generated using legacy application and stored in Oracle Database. React application was developed to show those data to different users and process the invoices further. This application can create a new user. User can be also updated based on their roles, user id etc. Technology used: HTML/CSS, React, Bootstrap, SQL, Spring Framework(Java).

Project 2.

Gaztec Rate Upload- This project was used to upload the different rates of call being made to one place to another. There are different customers present worldwide they can upload the rates for billing of calls. Technology used: Angular, HTML/CSS, JavaScript, Spring, Oracle SQL.

Project 3.

Gaztec 2.0 Oracle Network Mediation- Developed lookups based on some criteria provided by designer and deploy the jar on server and process the NAR accordingly. Technology Used: Java, SQL, Shell script, UNIX commands.

ALTAMETRICS

- Web application for store manager to manage the request raised by employees from Mobile application.
- Managed the web application according to the client requirements.
- Technology used HTML-CSS, JavaScript , SQL developer.
