SUMMARY

A frontend developer with 2.4 years of experience adept at creating visually appealing and interactive websites using ReactJS, Redux, HTML, CSS, and JavaScript. Experienced in working with the Angular framework as well, expanding the scope of web development capabilities. Proficient in Agile methodologies, including Scrum and skilled in GIT version control for optimizing project workflows and ensuring high-quality results.

EXPERIENCE

Developer – ReactJS

Suntec India   **May 2023 – Present, New Delhi, India**

· In my role as a ReactJS Developer at Suntec India, I specialize in crafting web applications and web-app modules using frontend technologies like React,Redux, Javascript, HTML-CSS. By writing clean and optimized code. I collaborate closely with cross-functional teams to translate design concepts into efficient and engaging user interfaces.

Software Developer

Tech Mahindra   **August 2021 – April 2023, Pune, Maharashtra, India**

· Built website components using ReactJS, Redux, JavaScript, ES6, HTML5, CSS3, Git, and Oracle SQL. Optimized website performance using a variety of performance optimization techniques and developed the website responsive with a strong understanding of CSS-based design & cross-browser compatibility.

Software Engineer Trainee

ANR Software   **March 2021 – July 2021, Noida, Uttar Pradesh, India**

· Successfully developed and deployed web applications using HTML, CSS, and JavaScript, resulting in a 20% increase in user satisfaction.
· Integrated front-end and back-end aspects of web applications with a strong understanding of web standards.

PROJECTS

Lead Report System

Suntec India · May 2023 – Present

· The Lead Report System is a comprehensive web application developed using React, employing a combination of class and functional components to deliver a robust solution for managing and tracking leads within the organization.
· The system facilitates lead tracking, data management, and insightful reporting. Tech Stack: React, Redux, HTML, CSS, Oracle SQL.

Onward Billing Portal (Client– British Telecom)

Tech Mahindra

In this project, I developed and deployed a cutting-edge React-based web application for British Telecom's Onward Billing Portal. The application catered to different user roles and efficiently displayed data populated from a legacy application running on the server. Tech Stack: React, Redux, HTML, CSS, Bootstrap, Oracle SQL, RestAPI, Java (Spring), and Jenkins.

Gaztec Rate Upload (Client– British Telecom)

Tech Mahindra

For British Telecom's Gaztec Rate Upload by employing HTML/CSS, Angular, JavaScript, Spring, Oracle SQL, and Shell-Script, we delivered an impeccable solution that met the client's exact requirements, further strengthening the client's relationship.

Gaztec Network Mediation (Client– British Telecom)

Tech Mahindra

 In this project for British Telecom. I involved in developing lookups based on specific criteria and deploying them as jar files on the server to facilitate efficient processing of Call Detail Records (CDRs). Tech stack: Java, SQL, Shell scripting, and UNIX commands.

E-Restaurant management (Client– Altametrics)

ANR Software

At ANR Software, I had the privilege of working on the E-Restaurant Management project for Altametrics. My role entailed developing responsive web pages tailored to meet the unique requirements of the client by skillfully employing HTML/CSS, JavaScript, and Oracle SQL.

EDUCATION

Bachelor of Technology (Computer Science)

Dr. APJ Abdul Kalam Technical University · 7.3 GPA · Lucknow, Uttar Pradesh, India · 2021

SKILLS

ReactJS, Redux, Javascript, Angular, ExpressJS, HTML-CSS, Jquery, GIT, Oracle SQL, Spring (Java)
